

Zero Tolerance Scam Policy

Hyip Police is committed to fighting fraud, determined to root out fraud, has a **zero tolerance towards fraud**, and will take action and/or seek redress against those people who commit fraud (in this case we are referring to HYIP scams).

Areas that we judge a HYIP by for being a fraud:

- Abnormally high return rates on investments (150% or more daily; 200% or more monthly).
- The percentage of people being paid back (must be 100%).
- Sketchy-looking new websites (suspicious) with no whois record.
- No or little support to the customer. Automated system responses to complains.
- Unknown area of trading their capital (claiming they have found the unique formula to financial investment).

Fraud is not a victimless crime – it is your money after all. Fraud is theft against you. Help us to ensure that all your spending goes to developing and improving services to both you and the investment program, not into thieves pockets.

If you know or suspect a HYIP for being a scam, please help us to do something about it. We strongly advise you [contact us](#) immediately to report it.

It's time for a real monitoring service to eliminate these scams, and with your help we are sure we can achieve that.

All referrals will be treated in the strictest confidence.
